 IN - FABRY B; WEGENER I
 AB - DE4327327 Nonionic surfactant compsns. (referred to as detergent mixts.) comprise: (a) a polyoxyethylene-polyoxypropylene ether of formula $R_1O(CH_2CHMeO)_m(CH_2CH_2O)_nR_2$ (I), where R_1 = 8-10C n-alkyl; R_2 = 1-4C alkyl or benzyl; m = 0.5-2 and n = 6-9; and (b) at least one other nonionic surfactant selected from narrow-range fatty alcohol ethoxylates; fatty alcohol polyoxyethylene-polyoxypropylene ethers; alkoxyated fatty acids, fatty amides, fatty amines and triglycerides; alkyl and alkenyl oligo:glycosides; fatty acid N-alkyl-N-polyhydroxyalkyl-amides; polyol fatty acid esters; sorbitan esters; polysorbate; phosphate esters; and amine oxides.
 - USE - The compsns. are useful for formulating automatic bottle-cleaning detergents, car body panel degreasers, compsns. for foam control in the sugar industry, dishwasher detergents,

hard-surface cleaners, dye dispersants, flotation aids, etc.

- ADVANTAGE - The compsns. are low-foaming, biodegradable, and have good wetting, cleaning and dispersant properties.
